An evaluation was given to all who were still present at the afternoon coffee break. 84 (105/91 in '16/'15) surveys were received in total. Following are the results of this evaluation survey.

1. How was the registration process?

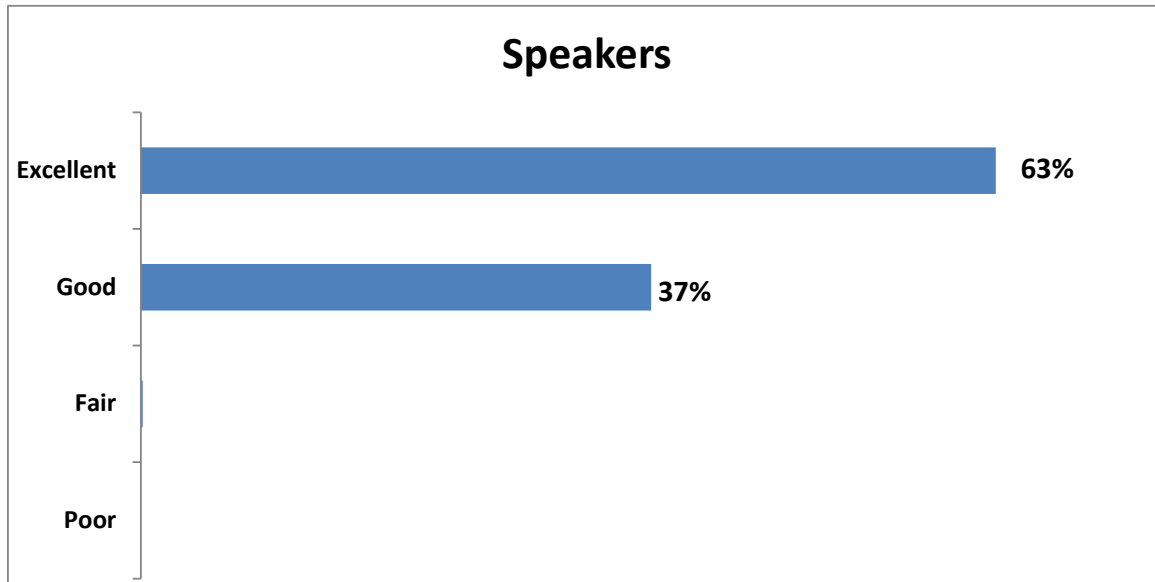

Almost identical results as 2016 (we are much improved over 2015)

2. How was the venue?

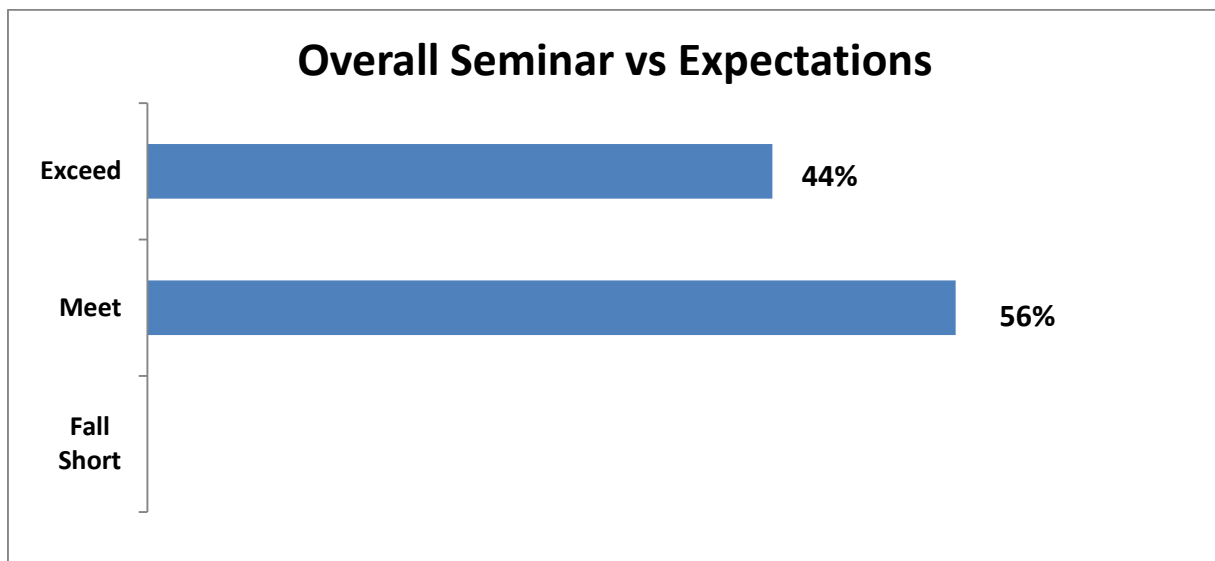

Even better than 2016, which had shown significant improvement over 2015

3. Overall, how were the speakers?

Significant improvement over 2016, which had seen a drop compared to 2015 (similar to '17)

4. Did this seminar.....your expectations?

Big improvement over 2016, which had dropped from 2015 (comparable to 2017).

5. What future topics would you like to see for a seminar?

Production Optimization through flowback & facilities set up / drilling efficiencies in 2017
Refracs, Nanoparticles, EOR, Water/CO2 flooding
Frac is king. New technologies is also nice to hear. Nanotechnologies
How about a shale field seminar - contact Dr. Roger Slatt @ OU if interested
More economics of frac/completion/methods/decision; Frac length/concentration (sand) vs production/reserves
Limited entry in horizontals
More case histories
More off the same
Reservoir Estimation for Unconventional Reservoirs
More case studies
Fracture modeling
Artificial Lift Design; Sustainability/Environmental Impacts
Production Analysis
Production problems - cause and solution
Artificial Lift; Asset evaluation for small scale acquisitions
Production/operations optimization; Identifying production problems
Breaker technology; modern diverters and their activities; Hi well operations
Horizontal drilling; Haynesville Shale Analysis
design and interpretation of DFTI; how to apply frac techniques and design in low capital ("mom and pop"), limited data areas
Big data; gathering, analysis; application
Directional drilling; coil tubing / well service applications in horizontal wells
Well bashing
Not sure!
Frac modeling
Economic Analysis; Secondary Recovery
Secondary Recovery Methods / EOR
Determining EUR early in the life of a well that is not yet showing production decline.
Operational Impacts in Well drawdown
Optimization of Well Spacing; Reducing Frac hits
ESP failures; Electrical Facility Fundamentals / Failures
Production forecasting for unconventional PTA/RTA
Diversion Analysis
Nodal Analysis
Fractured reservoir EOR; Blowout control
Rrefrac case histories
Surfactants & EOR in shales; density/spacing impacts on shale well EUR
Formation Damage; Acidizing
Cost analytics of industry completions
A second refrac seminar would be nice now that the industry has more experience / data with refracs
Fracture Design
With the evolution of frac technology and changes a frac seminar again would be beneficial. It's all about the topics/speakers
Frac hits; Parent/Child well issues
Produced Water frac & treatment
Waterflood conformance; Polymer squeeze; zonal isolation methods and results
Direct play techniques; San Andreas, Wolfcamp; Bone Springs; Recompletion design in older reservoirs
HF topics always good; broader issues of Unconventional plays would be interesting. Other topics - flowback practices, artificial lift optimization
Diverter systems
Infill/Density studies; microseismic
Pressure Transient & Rate Transient Analysis
Directional Drilling & Completions; Artificial Lift for horizontals
