

A significant resource base providing great opportunities

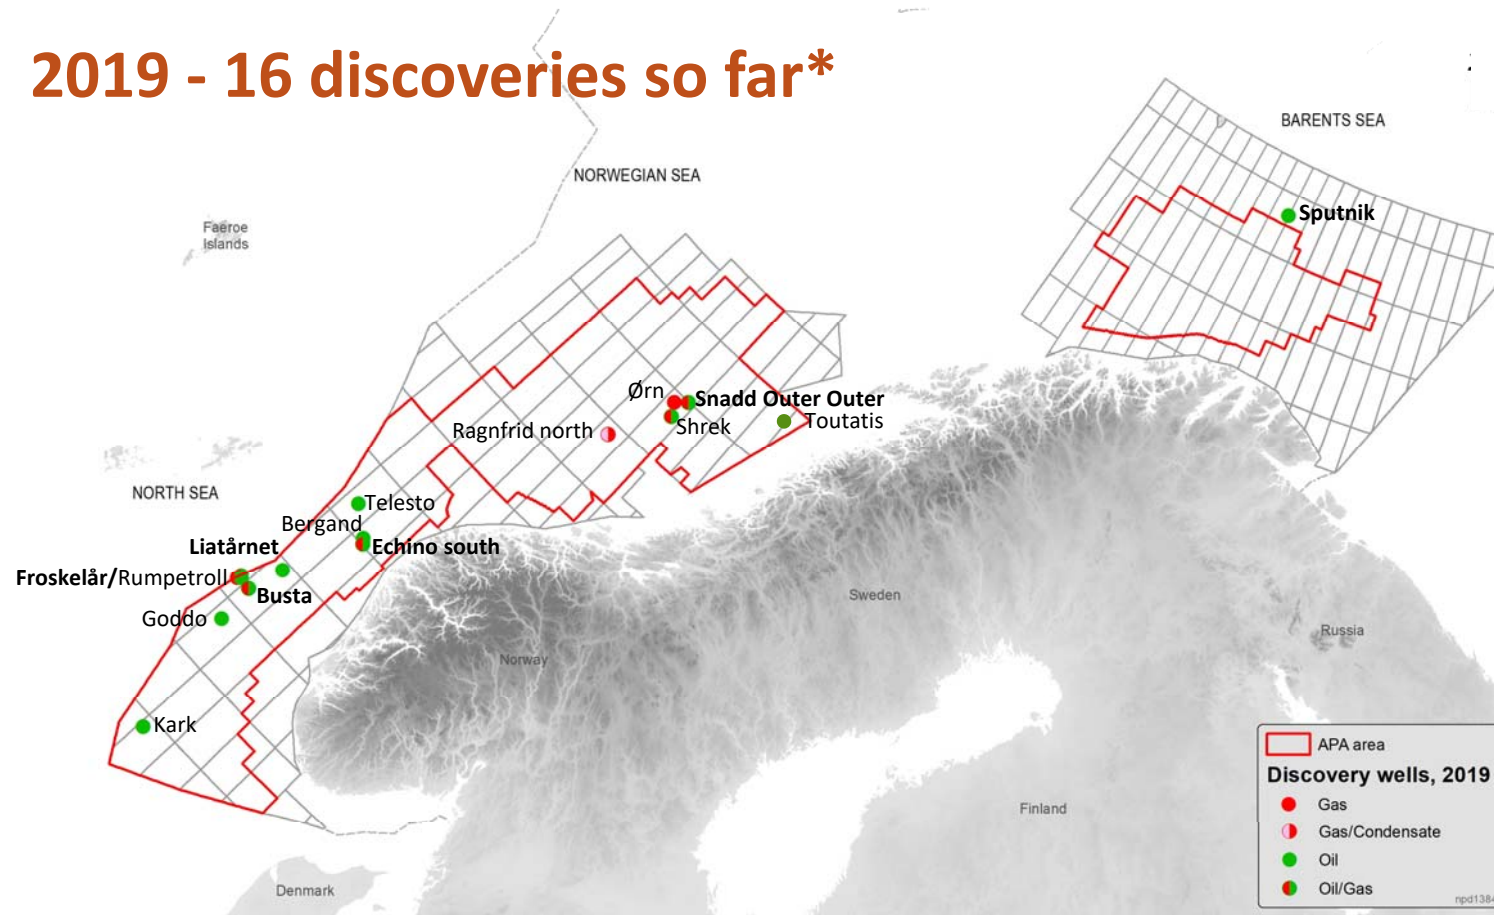

SPE Stavanger

Ingrid Sølvberg, Director Development and operations
Stavanger, 4 December 2019

More than half remains

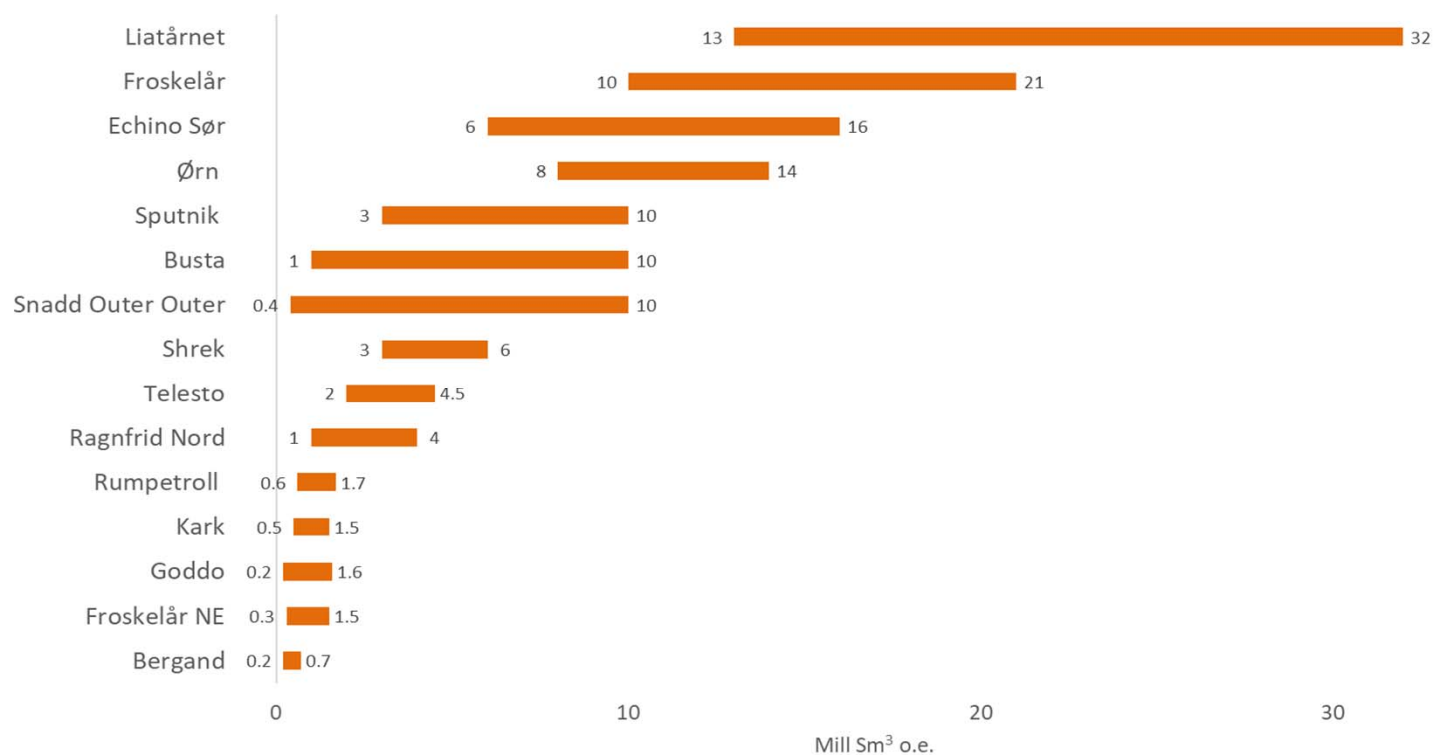

2019 - 16 discoveries so far*

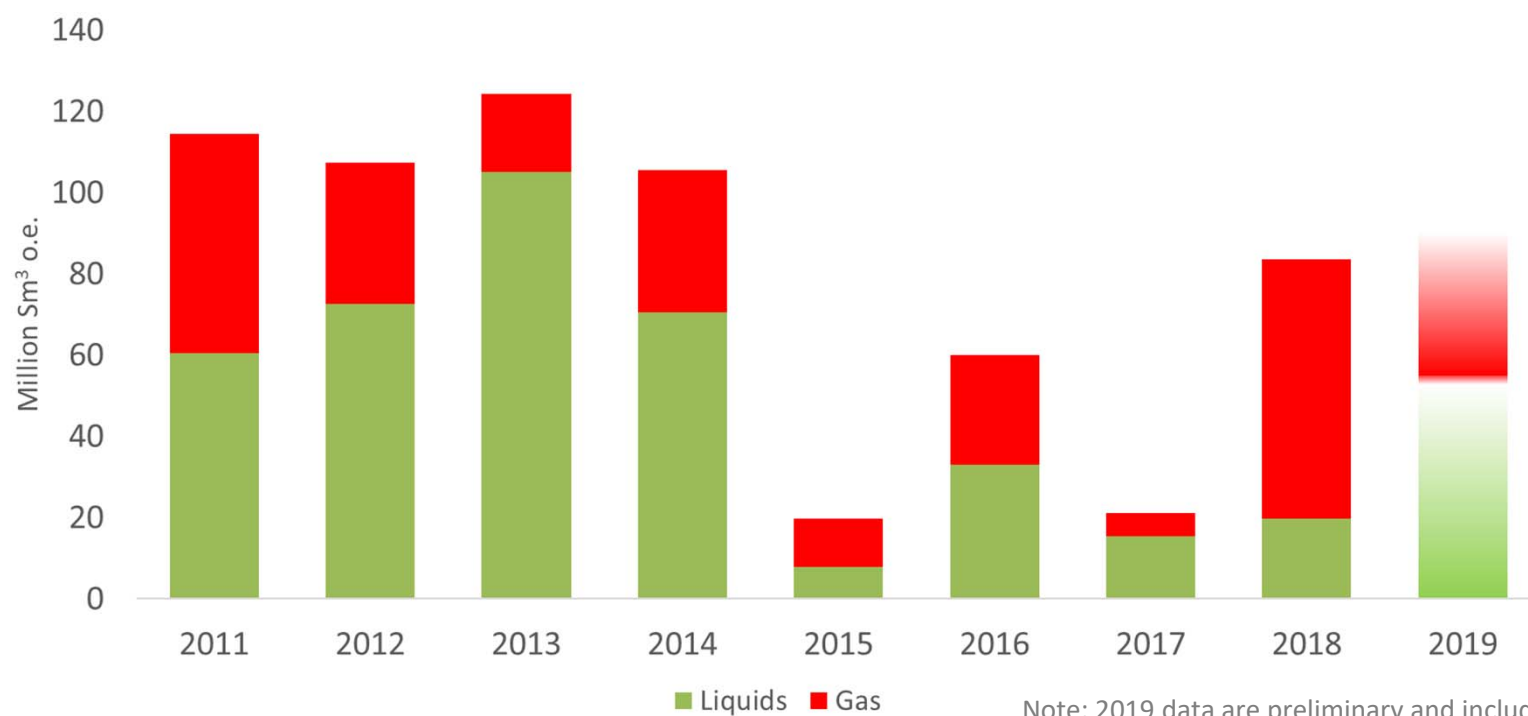

3 Note: Results are preliminary and include wells completed by 25 November

2019 Discoveries*

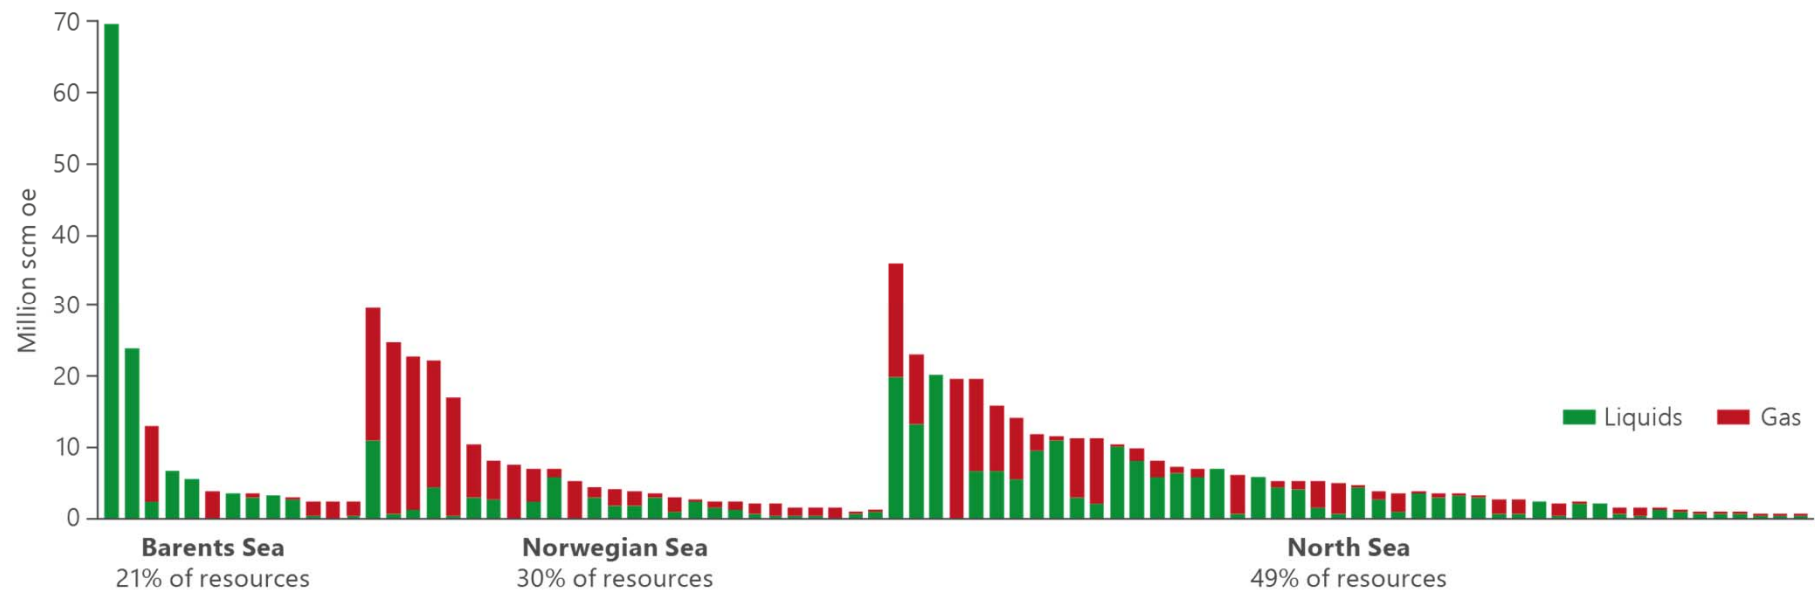

Note: Results are preliminary and include wells completed by mid November

2019 Discovered volumes* – more oil

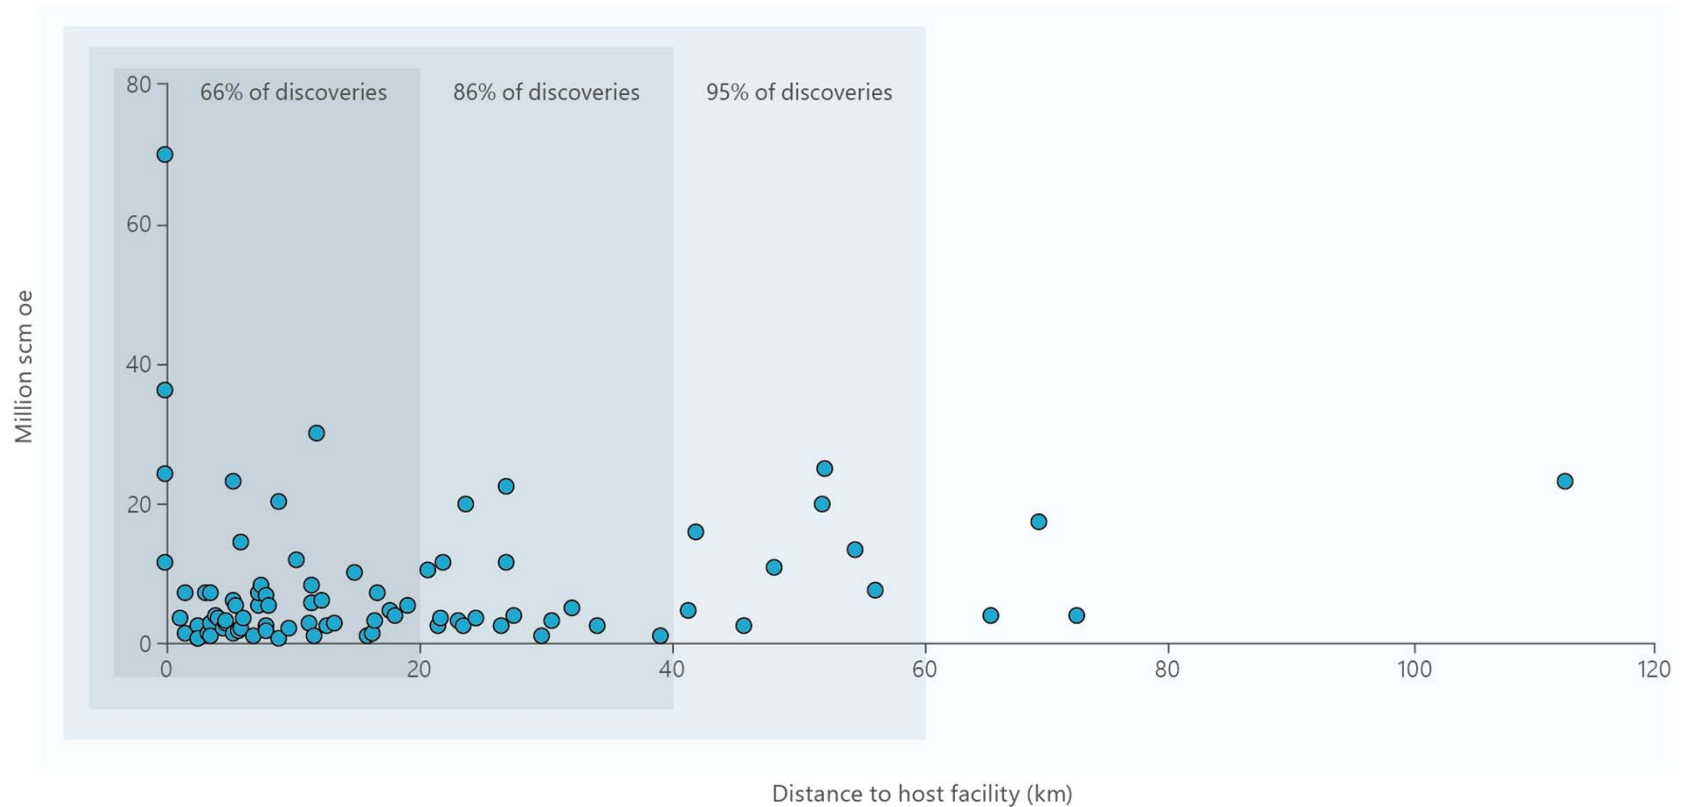

Note: 2019 data are preliminary and include wells completed by mid November

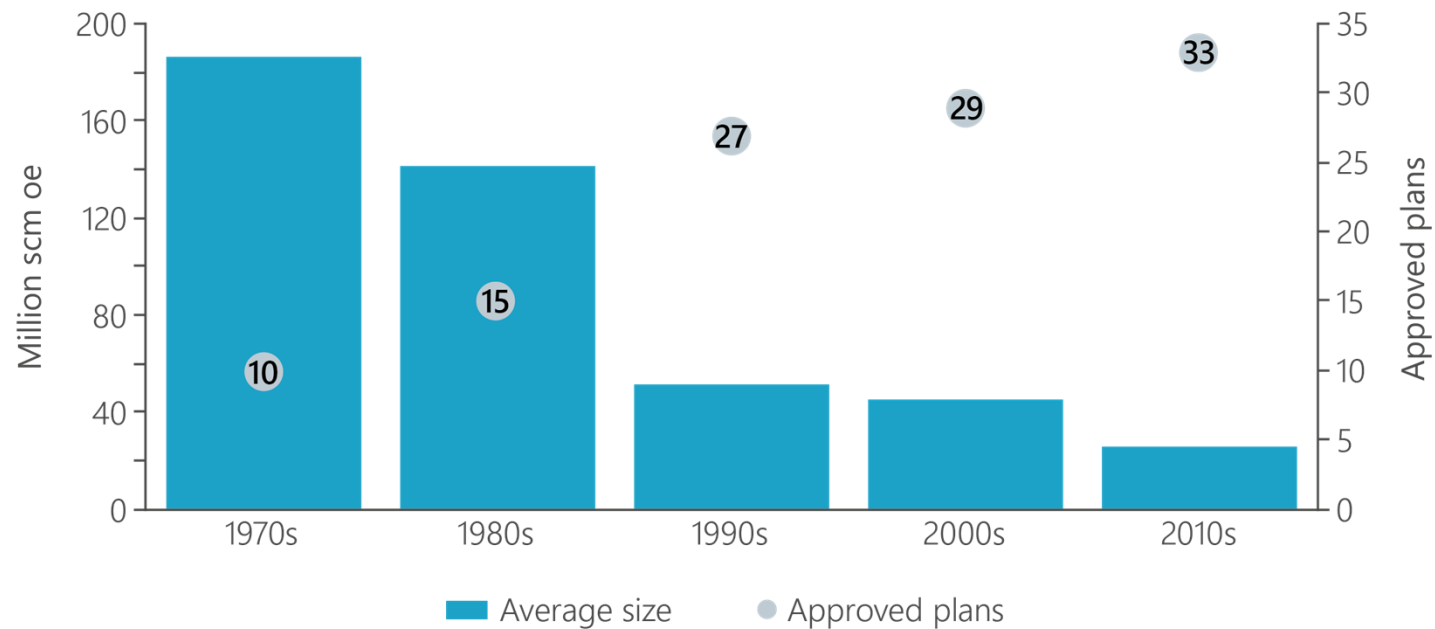

Discoveries in all areas

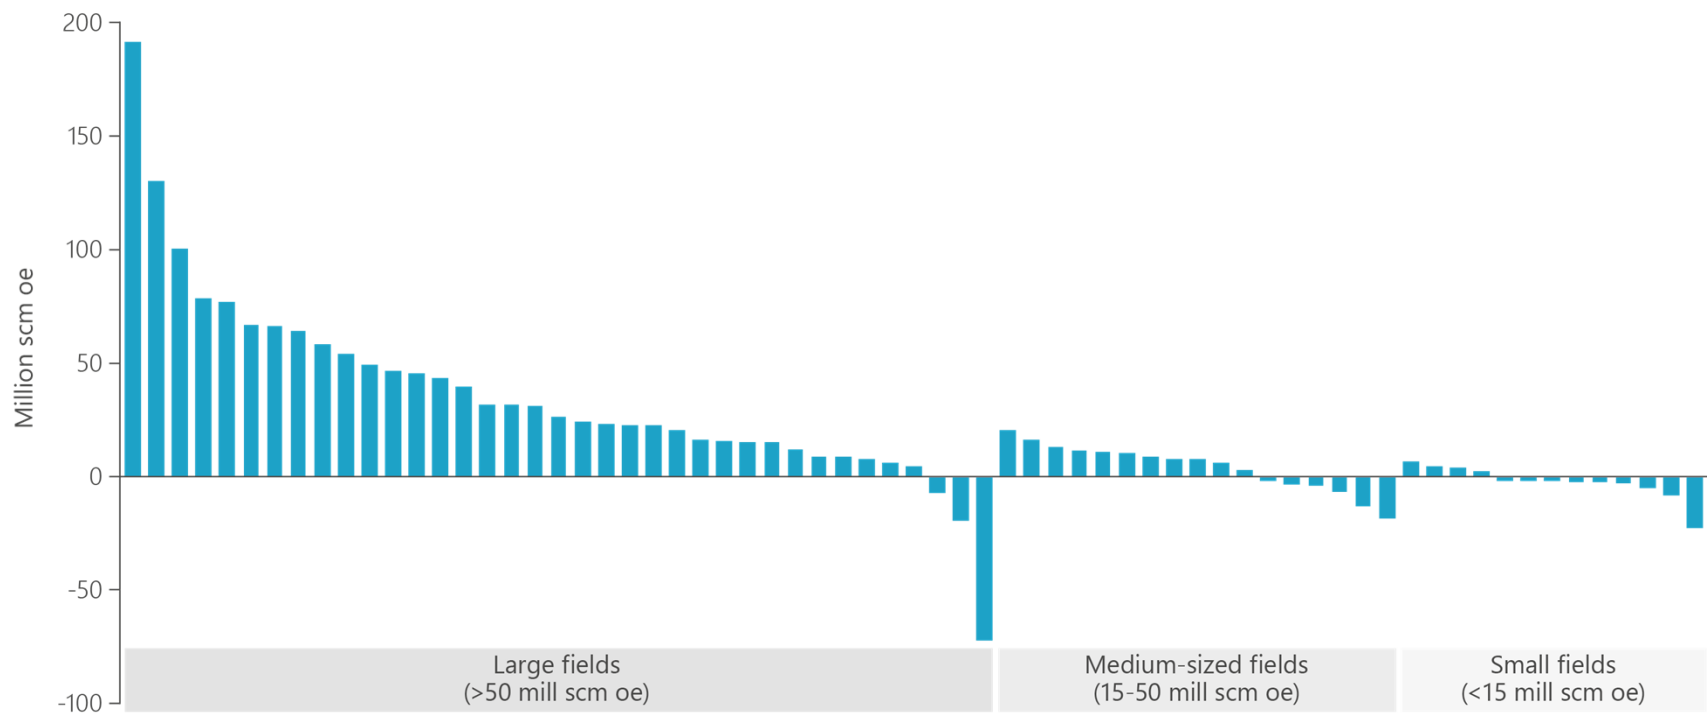

Most of the discoveries will become subsea fields

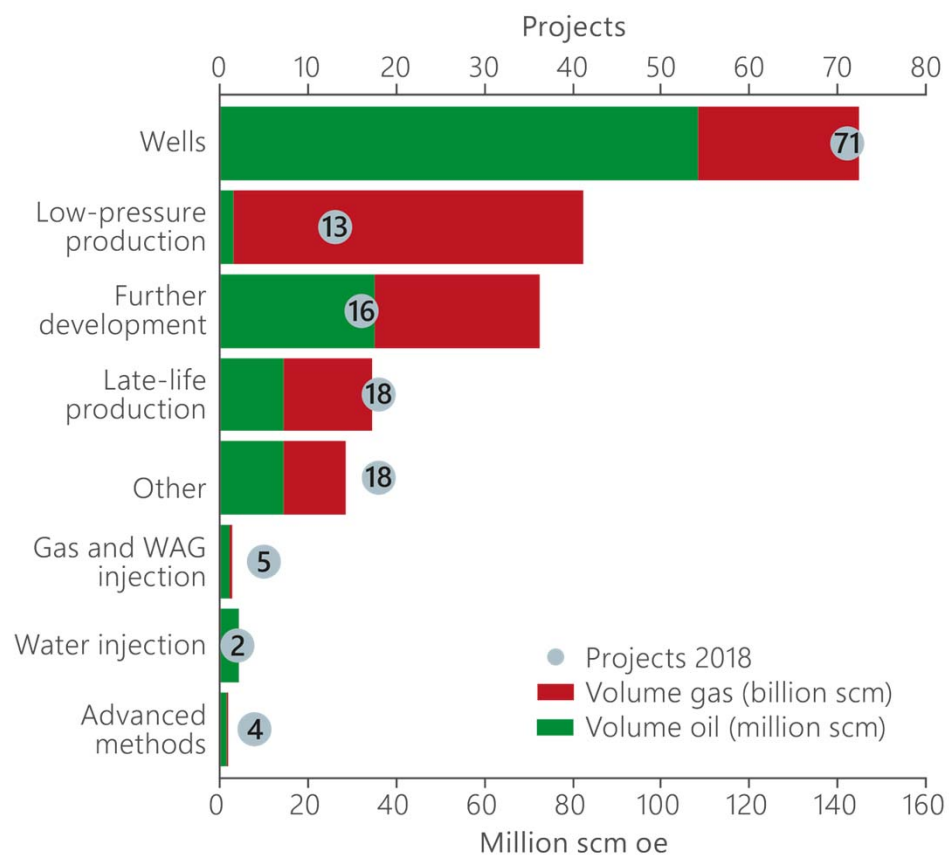

Profitable development of smaller discoveries

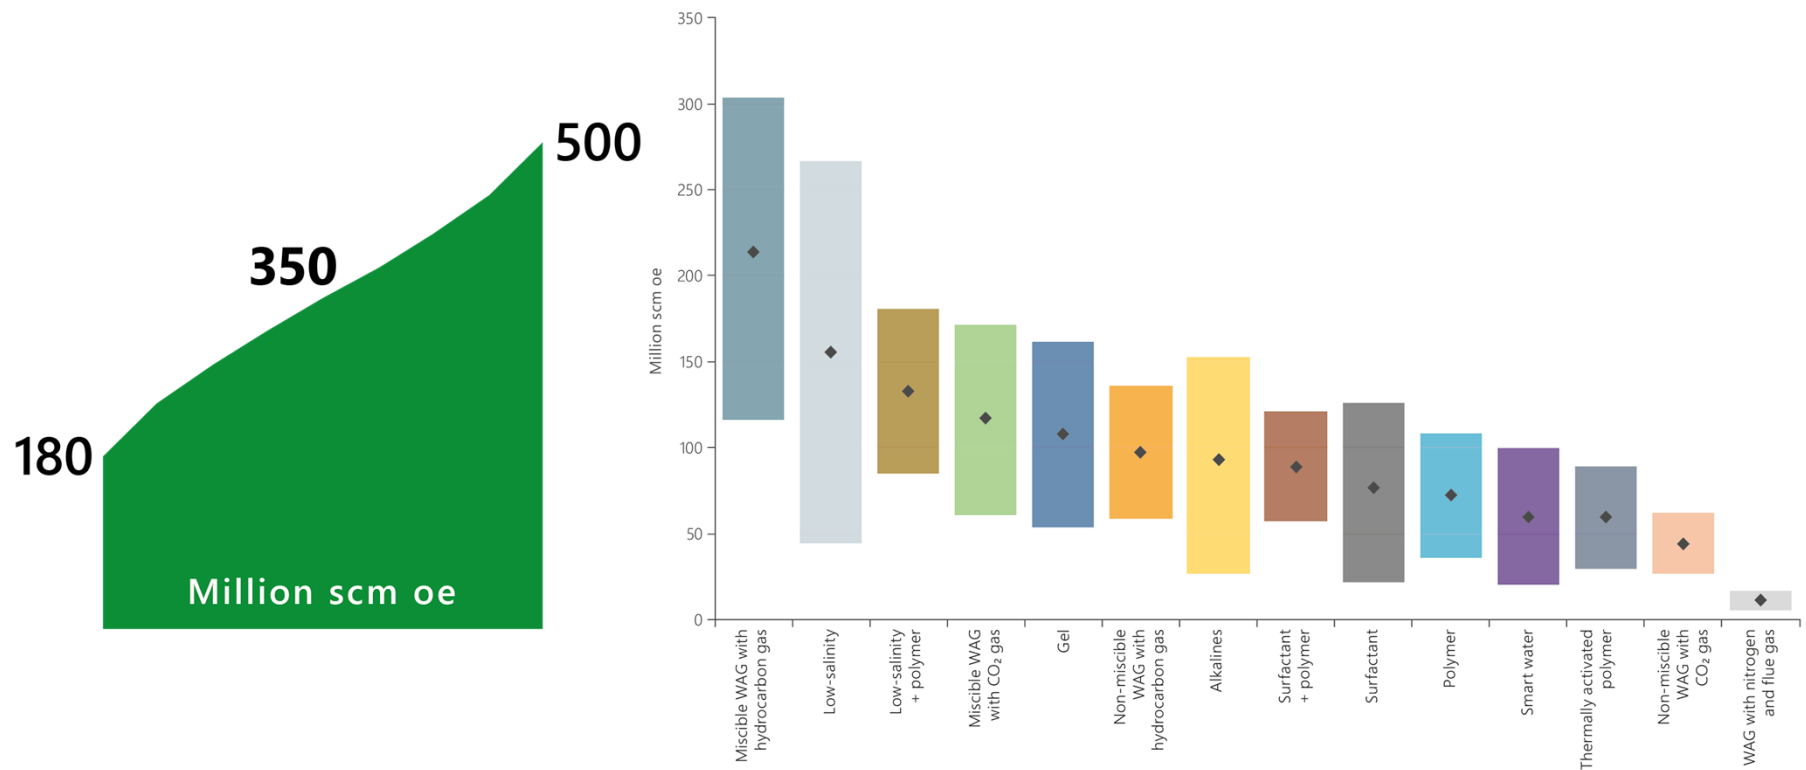

Increasing reserves – Johan Sverdrup x 3

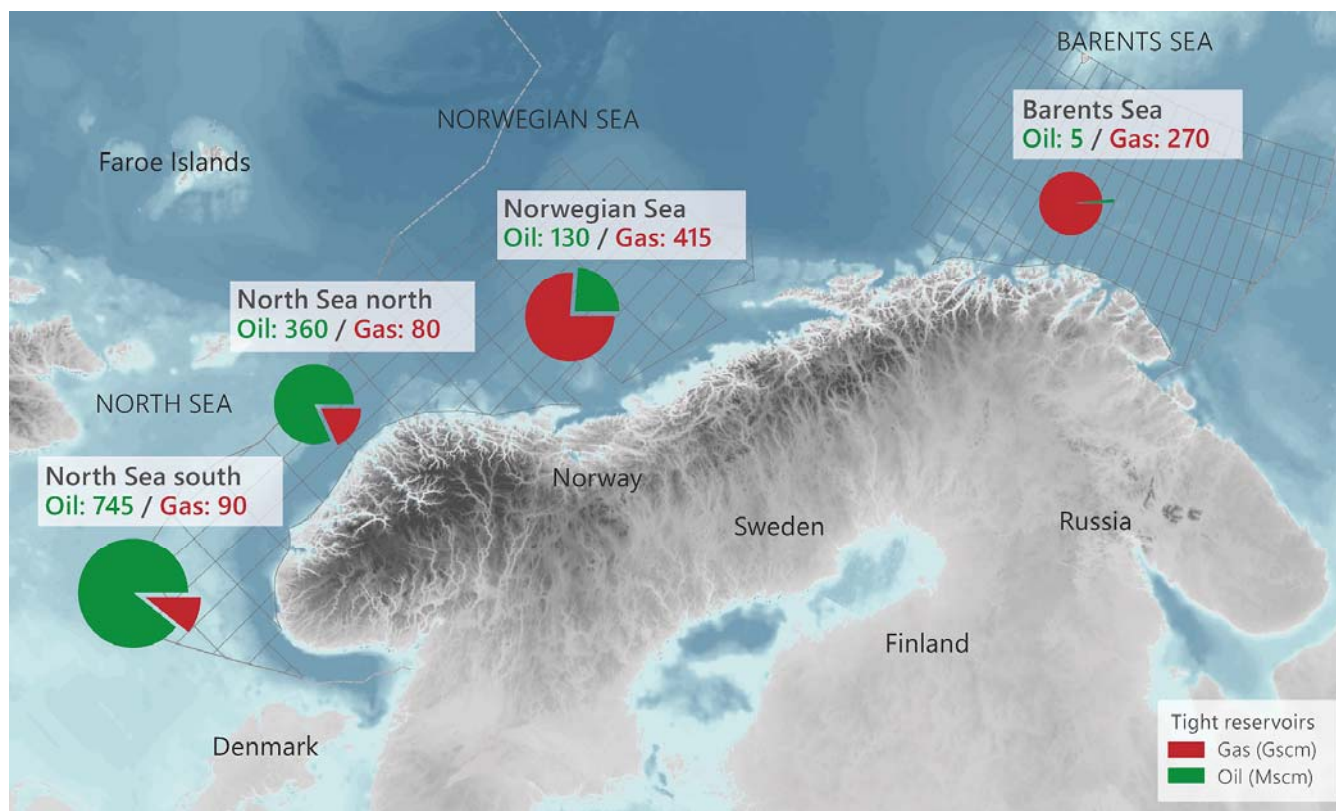

Increased recovery projects

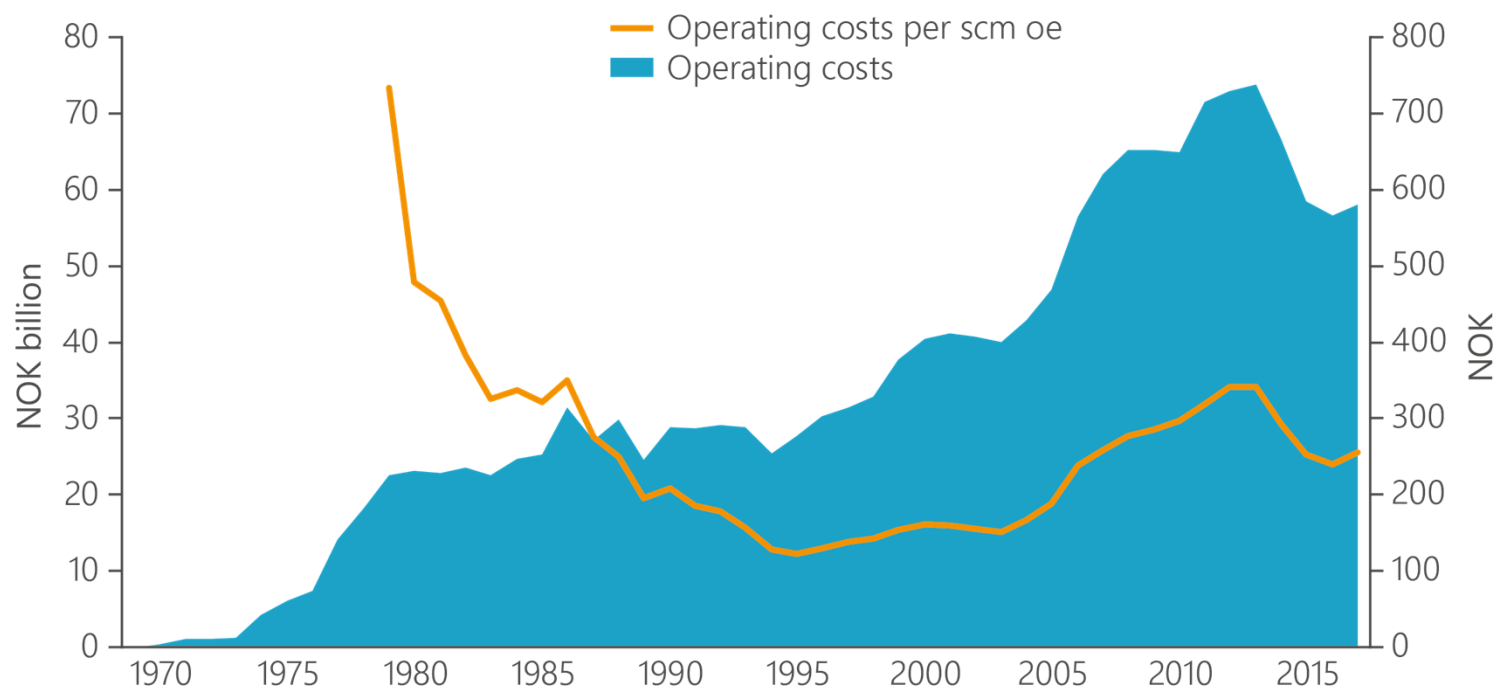

Significant EOR-potential – numerous viable methods

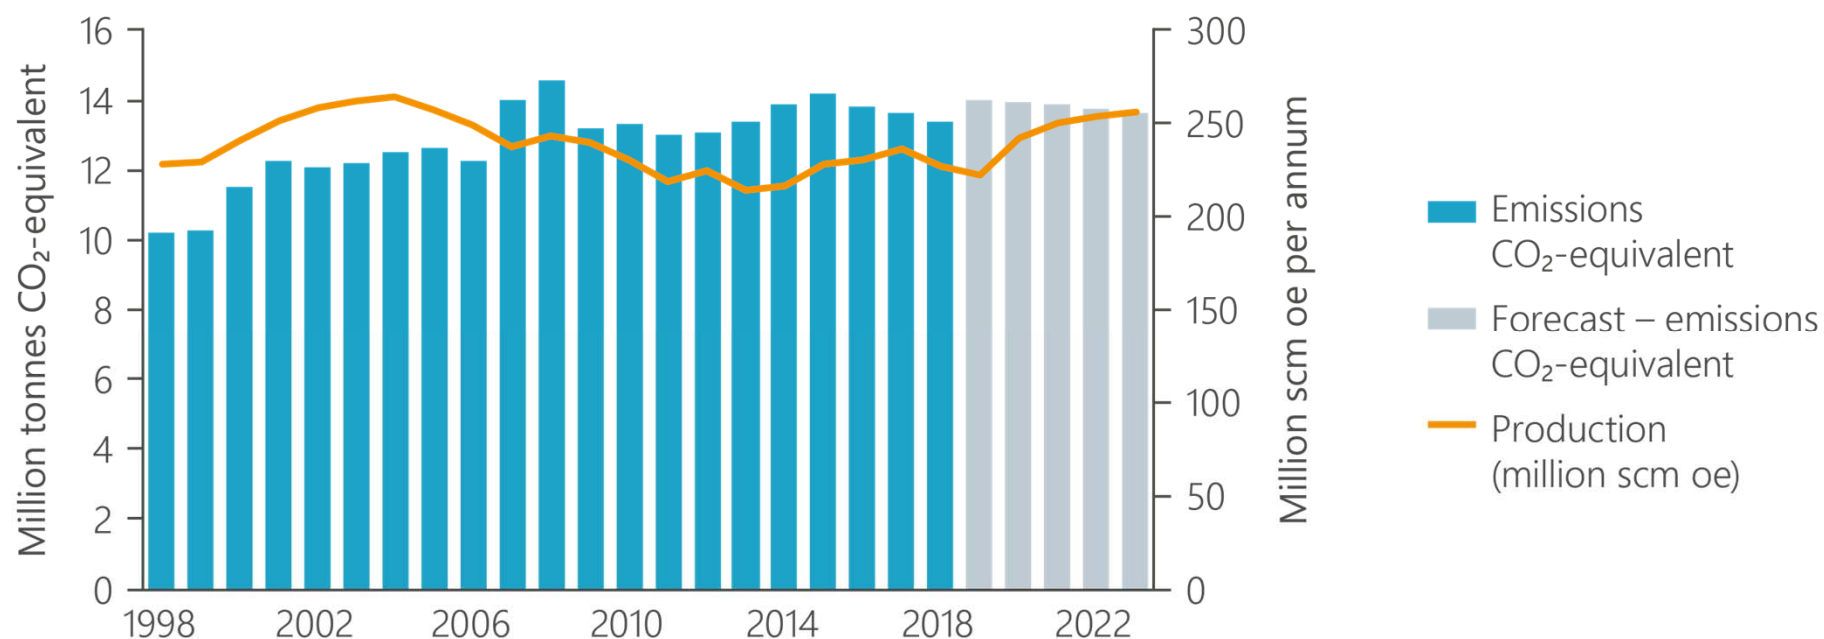

A lot of oil and gas in tight reservoirs

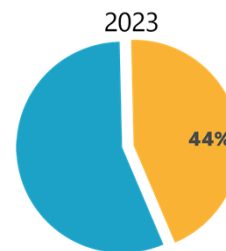

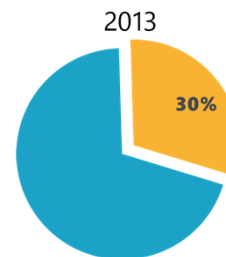

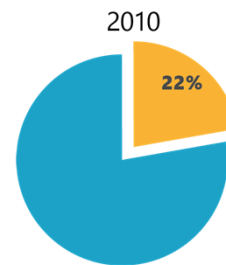

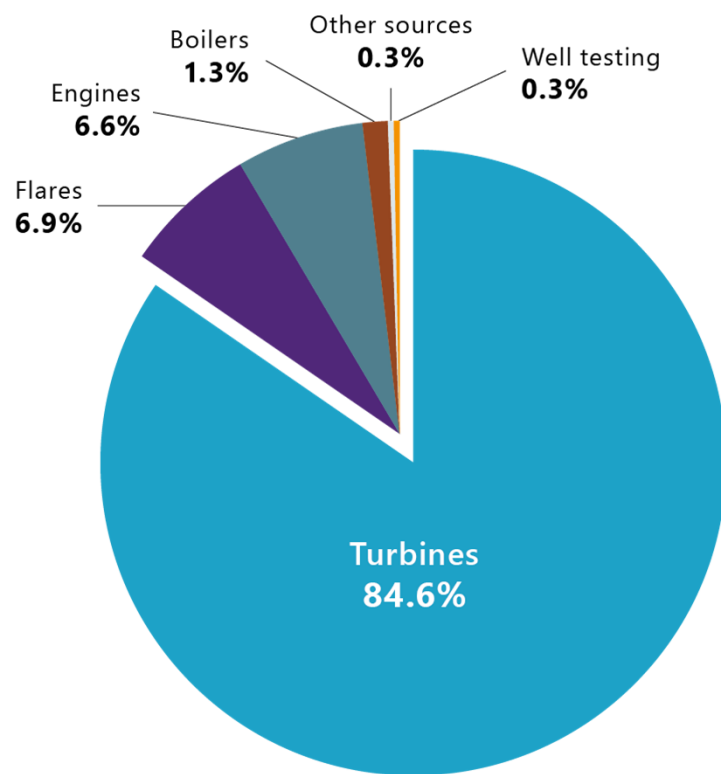

Operating costs are down

Production is rising, emissions remain stable

Turbine operation is the largest emission source

- Share of production with own power generation
- Share of production with power from shore

IOR award 2020

Who's the best at improved recovery? Send us your suggestions!

We will be awarding the Improved Oil Recovery award (IOR) at ONS 2020.

You can nominate projects, companies, production licences or people who create added value on the Shelf through the use of technology and work on improved recovery.

Nominate your candidate and read more about the IOR award www.npd.no/ior-award

The deadline for nominations is 1 March 2020.

We look forward to receiving many good suggestions!

**A significant resource base
providing great opportunities**
